

STAR test results for Sonoma County, Spring 2000

California established the Standardized Testing And Reporting (STAR) program in 1997 to assess student learning in the state's public schools. The most recent STAR test was administered in Spring 2000 using the multiple-choice Stanford Achievement Test series (Stanford 9). All students in grades 2 through 11 were tested. Students in grades 2–8 were tested in reading, mathematics, language, and spelling. Grades 9–11 were tested in reading, mathematics, language, science, and history/social science.

This chart provides a district-by-district summary of Sonoma County test scores. The scores indicate the percentage of students in the nation who scored the same or lower than the students tested in each district. The chart compiles test results for all students, including Limited English Proficient (LEP) students.

More information about the STAR program, school-by-school test scores, demographic reports, and year-to-year comparison figures are posted on the state Department of Education website, <http://star.cde.ca.gov>
